ENEOS Holdings, Inc.

Establishment of ENEOS Group Carbon Neutrality Plan (2025 Edition)

ENEOS Holdings, Inc. (President: Miyata Tomohide; “ENEOS Holdings”) announces that it has established the ENEOS Group Carbon Neutrality Plan (FY2025 Edition)*1.

In May 2023*2, the ENEOS Group announced its Carbon Neutrality Plan, which aims to achieve a carbon-neutral society in cooperation with the government and society. Based on changes in the business environment surrounding the ENEOS Group and the Fourth Medium-Term Management Plan formulated in response to these changes, ENEOS Holdings has updated the Carbon Neutrality Plan.

Under the updated plan, ENEOS Holdings has established multiple societal scenarios and revised its carbon neutrality guidelines in order to respond to an increasingly uncertain society, taking into account changes in the business environment surrounding decarbonization since its formulation in 2023. To reduce its greenhouse gas emissions, the ENEOS Group has aligned its targets with Japan’s NDC*3, and will make efforts such as reducing emissions in manufacturing and business operations. In addition, in order to contribute to the reduction of greenhouse gas emissions in society, a roadmap for energy and materials transition has been developed to meet social demands. ENEOS Holdings will continue to lead the supply of energy and materials necessary for the transition and conduct initiatives toward the realization of a carbon-neutral society.

The ENEOS Group will continue to take on the challenge of achieving both a stable supply of energy and materials and the realization of a carbon-neutral society through a variety of initiatives.
